International working group On-line Toxicity Monitoring, Setac Portland, 18/11/04

After the first implementation of the session "On-line Toxicity Monitoring" in SETAC-USA on the Fourth SETAC WORLD congress in Portland, 2004 an international working group was formed consisting of the participants of this special session (at the picture you can see the speakers of this session).

This working group is open to new members at any time. We welcome members from academia, government, industry and end users in the field of "on-line toxicity testing and monitoring".

The Aim of the working group is to strengthen "on-line toxicity monitoring" in scientific basic research, development of new methods, optimization of existing methods, development of guidelines and standards as well as implementation within new environmental legislation. Several actions were planned and projects were proposed.

More information can be received through Almut Gerhardt (LimCo International, GER, University of Aveiro, P, SETAC EUROPE Council) and Frank Butterworth, Institute for River Research International, www.watermemory.org or by sending an e-mail to the address mentioned below.
